## EDUCATION

---

**Veermata Jijabai Technological Institute (VJTI), Mumbai, June 2023**

B.Tech — Electronics & Telecommunication **CGPA: 7.95 / 10**

**Walchand College of Engineering, Sangli, October 2019**

Diploma — Industrial Electronics **Final Year Avg: 97.6%**

## EXPERIENCE

---

**Nuvama Wealth** | Bangalore Jun 2023 – Mar 2026

**Software Engineer I**

- ▶ Spearheaded front-end development of IPO, NCD, and Mutual Fund financial journeys on the new trading platform, increasing overall revenue from IPO and NCD by **4% YoY**.
- ▶ Optimized in-house **WebSocket streaming** for live market data, reducing price-update latency from 3 seconds to **under 100 ms** — a 97% improvement — by redesigning the data-binding pipeline.
- ▶ Build 12+ investment product showcase pages for 1,500+ Relationship Managers, driving **6% YoY AUM** growth through 4 animated experiences, text effects, and fully responsive layouts.
- ▶ Built a unified Account Center handling 4 login types with profile management, RM ratings, grievance resolution, and document upload, reducing ticket resolution time by **30%**.
- ▶ Built a complex F&O Margin Calculator with real-time streaming data for NAV, LTP, and percentage-change calculations, accelerating margin decisions for high-frequency traders.
- ▶ Implemented complete Mutual Fund transaction workflows — SIP, Lumpsum, SWP, STP, Redeem, and Switch — for 100,000+ investors.
- ▶ Contributed to a major architectural shift from Webpack to **Vite**, transitioning legacy modules into a decentralized **Micro Frontend (MFE)** ecosystem to enhance scalability and build performance.

**IBM** | Mumbai May 2022 – Jun 2022

**Frontend Engineer Intern**

- ▶ Built a reusable component library (15+ UI components) in HTML and CSS for enterprise-level internal tools, reducing per-page development time by an estimated 40% across 3 product teams.
- ▶ Improved cross-browser compatibility and responsive layout coverage to 100% across Chrome, Firefox, Safari, and Edge, eliminating client-reported rendering bugs in production.

## PROJECTS

---

**StreamOptics – Video Streaming Player & QoS Analytics Dashboard** — Personal Project

- ▶ Built an adaptive video streaming player leveraging **Shaka Player** and **HLS.js** to dynamically process multi-protocol HLS and **MPEG-DASH** feeds inside **Next.js**.
- ▶ Utilized **Zustand** with React and **HTML5 Media APIs** to engineer a custom UI overlay and QoS engine, optimizing atomic state updates to handle high-frequency telemetry events with zero frame drops.
- ▶ Streamed real-time playback telemetry over **WebSockets** to a Node.js, PostgreSQL, and Prisma backend to visualize live buffering ratios and bitrates on a responsive dashboard.

**Full-Stack Authentication Library & Monitoring Dashboard** — Personal Project

- ▶ Published a plug-and-play **NPM library** for authentication, streamlining developer workflows by enabling secure login, registration, and password recovery flows with minimal configuration.
- ▶ Built a Node.js and **PostgreSQL** backend using **Prisma**, implementing JWT auth with refresh token rotation, granular TTL management, and automated email OTPs.
- ▶ Built a real-time API observability dashboard, bridging backend logic with a minimal UI to monitor logs.

## TECHNICAL SKILLS

---

**Skills:** React.js, Next.js, MongoDB, TanStack Query, Zustand, Node.js, Redux, WebSockets, Jest, HLS.js, Prisma, AWS

**Languages:** TypeScript, Java, SQL, C++, Python

## CERTIFICATIONS & ACHIEVEMENTS

---

[Meta Front-End Developer Professional](#) — Completed 9 courses with an average score of 98%

[LeetCode 1800+ Rating](#) — Ranked in the top 7% on Leetcode globally
